## SUMMARY

Current Information Technology specializing in Application Development student and Full Stack Web Developer with a passion for Front End Development. Likes to build applications that are user-friendly and can make things a little more convenient for the user in their day to day life. Works efficiently to accomplish my given task and aids others when help is needed.

## TECHNICAL SKILLS

**Program Languages:** Java

**Database:** MySQL, NoSQL, MongoDB, GraphQL, Apollo

**Web Design:** JavaScript, HTML, Node.js, CSS, Bootstrap, Express, Object-Oriented Programming, React, Vite, jQuery, Rest APIs, Handlebars, Sequelize, Full Stack Development, Front-End Development, Back-End Development, Figma

## PROJECTS

**Recipedia** | <https://github.com/ruggerheist/recipedia> |  
<https://ruggerheist.github.io/recipedia/>

Recipedia is a website where the user can look up a food item and be given a list of 10 recipes to choose from where they can get the instructions, ingredients needed, and the nutritional facts for each ingredient. My responsibility in this project was to get local storage to save and display each food search by the user, making sure repeats were not displayed twice in the history. Also contributed a bit in the styling as I worked on making the website responsive to different screen sizes. Recipedia was built using HTML, CSS, JavaScript, and alongside with a recipe and nutrition api.

**Bookbusta** | <https://github.com/Nneifem/bookbusta> |  
<https://bookbusta-950538aa625f.herokuapp.com/>

Bookbusta is a website for users to create an account, be able to look up books by title or genre, save them to their favorites, leave comments on the book, and review comments left by others. My responsibility was to get the book api to display the book information wanted and search book by genre to work properly. The tools used for Bookbusta were the book api, axios, bcrypt, dotenv, express, session, handlebars, sequelize, mysql2, and bootstrap, JavaScript.

**Habit Your Way** | <https://github.com/slmov215/habit-your-way> |  
<https://habit-your-way-habit-tracker-8b86617a280e.herokuapp.com/>

Habit Your Way is a website where the user can create an account, add their daily habits throughout the day along with pictures and set goals for yourself. My responsibility in the

project was to get the cloundinary, the api to upload images to work, setting up the activity form for the user to input their data, styling the website, and getting the dark and light mode to work. The tools used were react, apollo, bootstrap, node.js, express.js, graphQL, mongoDB, JWT, and cloundinary api.
